SUMMER CAMP OVERVIEW

Little Dolphins Summer Program offers both Spanish language and access to our new Makerspace. Mixing the philosophy of design thinking with bilingual education, this camp engages the full creative brain, in a fun and stimulating learning environment.

Our Makerspace encourages kids to imagine, create and share through play and the open-ended exploration of materials and tools. We celebrate play as a meaningful learning opportunity, in order to harness the imagination for creative expression and discovery. Our resources will both nurture and empower children to imagine, make, invent, create and express themselves in a variety of ways.

Using design-based thinking, children learn to navigate the creation process, from inception to completion. It teaches learning by doing, and more importantly, learning from failure. This approach strengthens children's openness to new experiences and peer collaboration. It caters to and embraces diverse learners, thinkers and doers, and brings together different subjects and bodies of thought. Our camp cultivates curiosity and invention, stretches the imagination and promotes both creative and analytical thinking.

This summer camp is an opportunity for intrinsic learning, a gateway to self-confidence and positive self-esteem, and provides life skills for the future in an environment of healthy social interaction. Our camp positively impacts academic performance in school across all subjects to help combat the summer slump. Each week we will offer themed activities in both Spanish and English Instruction.

SCHEDULE

WEEK 1: July 9 - July 13

WEEK 2: July 16 - July 20

WEEK 3: July 23 - July 27

WEEK 4: July 30 - August 3

WHAT ARE MAKERSPACES?

The rise of the MakerSpace movement around the world is aimed at addressing modern day challenges with design thinking. It is rooted in the belief that we must adapt to new changes in today's technological world by adopting creative thinking and learning. This educational philosophy promotes problem solving skills through a hands-on project based model of learning, aligning with the Little Dolphins - Seven Arrows principals and mission. We hope to foster a culture of innovation and visionary thinking, nurture students' creativity, imagination, and collaborative dexterity.
